

Revenue-Cycle & Denial Management

Reviews claims, classifies denials, drafts grounded appeals, tracks payer responses — a denials specialist submits.

~11.8%

initial claim denial rate (2024) and climbing; 41% of providers report >10%

~\$18B

U.S. hospital spend in 2025 overturning denials (of ~\$43B on billing & collections)

35–60%

of denied claims are never reworked — permanent, avoidable revenue loss

How we solve it

load_claim → analyze_denial → gather_evidence → draft_appeal → compliance_check → [Denials Specialist gate] → finalize

Outcomes

- Faster, consistent denial triage
- Grounded, policy-cited appeals in seconds
- Less abandoned revenue
- Auditable trail for every touch

The bright line

The agent never submits a claim — `clearinghouse.submit\_claim` is withheld; a biller submits.
