

Patient Access

Scheduling, registration, benefits verification, Good Faith Estimates, referral status — a rep approves writes.

23–33%

typical U.S. outpatient no-show rate; avg cost ~\$200 per missed appointment

~\$150B

estimated annual cost of missed appointments to the U.S. healthcare system

GFE

No Surprises Act Good Faith Estimate required for self-pay / uninsured patients

How we solve it

verify_identity → check_eligibility → estimate_cost → get_availability → prepare_summary → compliance_check → [Access Rep gate] → finalize

Outcomes

- Fewer no-shows and leakage
- Fewer front-end denials downstream
- Compliant Good Faith Estimates
- Identity-safe member disclosure

The bright line

The cost estimate is a deterministic Good Faith Estimate tool — never the LLM; no disclosure without verified identity.
