

Payment Integrity & Coding

Validates codes (NCCI/MUE), checks medical necessity, flags overpayments and duplicates — a reviewer confirms.

\$28.8B / \$37.4B

FY2025 Medicare FFS / Medicaid improper payments
(6.55% / 6.12%)

~\$40B

Medicare Advantage overpayment attributed to coding
differences (MedPAC 2025)

22.3 : 1

FY2025 Medicare program-integrity ROI (savings
\$26.3B → \$41.9B, +59%)

How we solve it

load_claim → analyze_coding → detect_issues → draft_finding → compliance_check → [Payment-Integrity Reviewer gate] → finalize

Outcomes

- Fewer coding-driven denials
- Surfaced overpayments / duplicates
- Lower FCA / OIG exposure
- Human-confirmed, audited flags

The bright line

The agent flags only — no recoupment, payment adjustment, or claim submission. A mismatch is a flag for review, never proof.
